Confidentiality Statement

The document is considered proprietary and confidential information of DataTech One Ltd ('DataTech'). The release of this document would offer a substantial benefit to competitors offering similar services. This document includes information pertaining to strategy, methodologies and techniques which have taken a considerable effort and time to develop. Therefore, the use of this document for purposes other than an evaluation of its content as a basis of contract award is prohibited. It is DataTech policy that all material and content herein is not subject to release.

This document and the information herein contained (including any attachments hereto) is confidential and is intended solely for the use of the individual or entity to whom it is addressed.

Furthermore, DataTech warrants that to the best of its knowledge those who prepared this material have taken all reasonable care in preparing it and believe its contents to be true as at the date of this document. DataTech cannot however warrant the truth of matters outside of its control and accordingly does not warrant the truth of all statements set out in this document to extent that such statements derive from facts and matters supplied by other persons to DataTech. The statements in this document are qualified accordingly.

As a Partner

DataTech is a technology focused company privately owned and currently present in 6 countries. Since its inception in 2003 DataTech has become market leaders in Malta and Libya for SAP enterprise and performance based products implementation projects. Today DataTech is an SAP value added reseller and service partner in both Europe South, Middle East and North Africa (EMEA) and services some of the most demanding organisations providing unrivalled consultancy in digital technology transformation. DataTech enables its clients to reimagine their information processing by providing a combination of best market products and consultancy excellence.

The vision of DataTech is to consolidate its position as a market leader whilst expanding its portfolio of services and new technology disciplines to better serve its growing clients demand.
